ICE-Trade ® Safety Chucks

The ICE-Trade Safety Chucks are either foot or flange mounted.
Standard the Chucks come with a U shape socket.
On request a V shape socket is available.

The sockets are heat treated, the axle phosphated and the disc electro galvanized.

As an option the Chucks can be fitted with wear plates.

Till 22 metric ton the ICE-Trade Belt Winders features as a standard the Safety Chucks.
Above that weight the requested torque is often too high and therefore ICE-Trade has
other solutions, like the ICE-Trade winding axle Roller Support, or simply with brass
bearings.
