ICE-Trade ® Cleat Cutting Machines

The ICE-Trade Guillotine for Cleats

The ICE-Trade Guillotine for Cleats is developed to cut cleats, quick, safe and rational. The ITGC features an input table and output table, made to size according the request of the customer, a stopper to cut all the cleats on the same pre-set length, a removable cover next to the knife to have the smaller size cleats slide in a box under the table and is covered at the top with “security” glass .

Smaller cleats can be cut multiple, as the knife has a length of 500 mm.
The knife is made from high quality HSS.

The operation is on the control box in the front of the machine,
with two hand simultaneous pressing at both sides of the box.
Those push buttons are 'hold-to-run' which means that the knife doesn't have
to go all the way up for cutting the next series to be cut, which saves time.

Furthermore the control
box features the emergency
stop and reset button for
the emergency circuit.

The ICE-Trade Hydraulic Group,
for the ICE-Trade Guillotine for
Cleats is compact and powerful.
Cutting speed is till 60 mm/s.

The ICE-Trade Cleat Cutting Machine

ITCCM, made to cutting cleats, fast, easy, neat and economical.

With a proper cut, under 90° , the cleat cutting machine saves much time. The ITCCM features an adjustable stopper, so all cleats, to be cut, will have the same length. For each type of cleat a 'form' is made out of stainless steel, which makes that the cut is indeed 90° .

The Cleat Cutting Machine cuts cleats up to T-120.

The result :
